DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Allowable Subject Matter

5. The following claims are drafted by the examiner and considered to distinguish patentably over the art of record in this application, and are presented to applicant for consideration:

4. (proposed) A racket string aligning device having three tools combined in a single longitudinal body, said device comprising a hilt, said hilt comprising a first end having two lateral faces distally converging to form a wedge with a transverse notch in which a string may be forced and a lateral appendage that provides a hook; and said hilt further comprising a second end including a notch which houses a cutting edge.

5. (proposed) A tool for aligning racket strings, said tool comprising:

a hilt having first and second opposing portions;
said first portion comprising a hook and two lateral faces distally converging to form a wedge adjacent to the hook;
said second portion comprising a blade for cutting the racket string.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
